

# Library of Hope

Over 250 million children worldwide are failing to achieve basic literacy, and more than two thirds of this population are female. The Song Saa Foundation has partnered with Room to Read to help provide all children with educational learning aids and access to a wide range of reading materials to improve education for the children of the Koh Rong archipelago, regardless of gender or background.

## Project

By partnering Room to Read's innovative model with our Boat of Hope community outreach initiative, the Song Saa Foundation will assist schools in the archipelago, by providing vital educational support during the most critical points of a child's schooling: primary school for literacy acquisition, and secondary school for girls' ongoing education.

## Objective

Delivery of at least eight Library of Hope missions covering all five communities within the Koh Rong archipelago in 2017.

## Impact

- Improve the literacy rate in the Koh Rong archipelago.
- Create opportunities for local children to gain a well rounded education
- Ensure that every child within the Archipelago has access to a selection of books, year round.
